

COVID – 19

A reminder to the Town of Maidstone Community and surrounding area. The continued out - break of COVID – 19 is closing in. We, as the public, need to take all recommendations from the Government of Saskatchewan seriously. We have posted the link for up to date information on our web site and facebook page. Schools have also been informing parents on what to do and how to respond. Daily updates are being provided to the Province.

If you have returned from travelling or are currently returning from travelling, please follow the mandate that has been provided from the Government of Saskatchewan. We have certain groups of people that have already been identified as at-risk population. If we work together and follow the mandates that have been provided, we may be able to do our part and reduce local transmission in the Maidstone area.

Our service model for the Town of Maidstone will be fluid in nature and change as needed. The health and essential services of our community is our priority. Thanks for your cooperation in this matter.

Town of Maidstone
March 16, 2020
