

TOWN OF MAIDSTONE

INFORMATION TO THE COMMUNITY ABOUT TOWN SERVICES

The administration staff and public works staff has met and discussed different scenarios to do with the possible COVID -19 outbreak that may affect our community and how that may affect the functions of our Town. From these discussions it was determined that the services should be prioritized in the following order:

- | | |
|----------------------------|----------------------------------|
| 1. Water and Sewer service | Must Operate |
| 2. Public Works | Must/Possible Modified Operation |
| 3. Council/Administration | Must/Possible Modified Operation |
| 4. Office Staff | Possible Modified Operations |
| 5. Recreation Facilities | May or may Not Operate |

The Water and Sewer Services are at the top of list and will have resources directed toward continued service if needed in the event of an outbreak.

The Fire Department will continue to provide services.

Some services that are not Water and Sewer related may be limited at times or suspended according to needed response.

The Council and Staff of the Town of Maidstone appreciate your patience and understanding as the situation develops and is constantly evolving and our ability to provide all required tasks may become limited.
